Dear Hal,

I thought you might find The Ray and "Wegmann Files" stories of interest.

The Clinton testimony seems valid. The theory (repeated by Tony Summers) that it could have been Bannister rather than Shaw does not work since Manchester and Palmer knew Bannister.

The news up here was that The Ray pills were tested but the test results are being kept secret.

Jim Marrs wrote a new book called "Alien Agenda."

Monroe was going to call a press conference

and announce what J.F.K. told her about "Aliens".
J.F.K. told William Holden that he would like to tell the public about The "Alien situation but that "his hands were tied."
Amusing but absurd.
Mars appears to have no critical or analytic intelligence.

"The old Soviet proverb- it is harder to predict the past than the future" - applies to The J.F.K. case.

"Never again" was great.

Sincerely,
EC
